

**Amendments to the Specification:**

Amend the Specification as follows:

Amend page 57, lines 27 – page 58, line 7, as follow:

Referring next to Fig. 2, the client computer 10 is configured such that a processing unit (hereinafter referred to as “PU”) 30 and a memory 32 are interconnected through a bus 34. The memory 32 is structured to include a storage medium, such as a ROM, a RAM, a magnetic disc, an optical disc, etc. The memory contains a program memory 36 in which there has been stored various programs for achieving such as a transmission and reception function, a browsing function, etc.

Amend page 102, lines 2-8, as follow:

As shown in Fig. 30, the store in which the present embodiment is practiced is equipped with a beverage server 230. Upon a customer's selection of one of a plurality of buttons of the beverage server 230, ~~[[as]]~~ functioning as a plurality of its handles, it pours one of the plurality of kinds of beverages which corresponds to the selected button, into a glass ~~[[232]]~~ 234 placed at a predetermined pouring location.

Amend page 102, lines 15-19, as follow:

As shown in Fig. 31, the constitution determining system 240 contains a computer 242 which is constructed in the same manner as the server computer 200 in the third embodiment. The computer 242 is constructed such that a PU 250 and a memory 252 are interconnected through a bus ~~[[254]]~~ 253.
